AIR BREAKDOWN

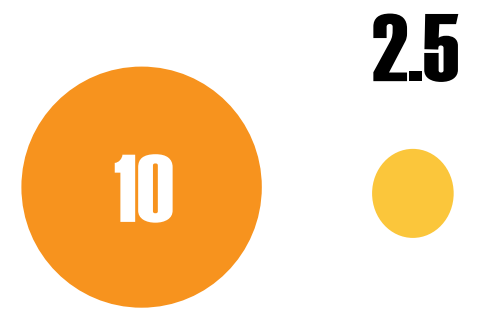

what is the **KEY TO LIFE?**
the **AIR** that we breathe!
according to **wiseGeek** it is
“what makes life on earth
possible.”

AIR QUALITY BREAKDOWN

AQI	POLLUTION LEVEL
0 - 50	GOOD
51 - 100	MODERATE
101 - 150	UNHEALTHY FOR SENSATIVE GROUPS
151 - 200	UNHEALTHY
201 - 300	VERY UNHEALTHY
300+	HAZARDOUS

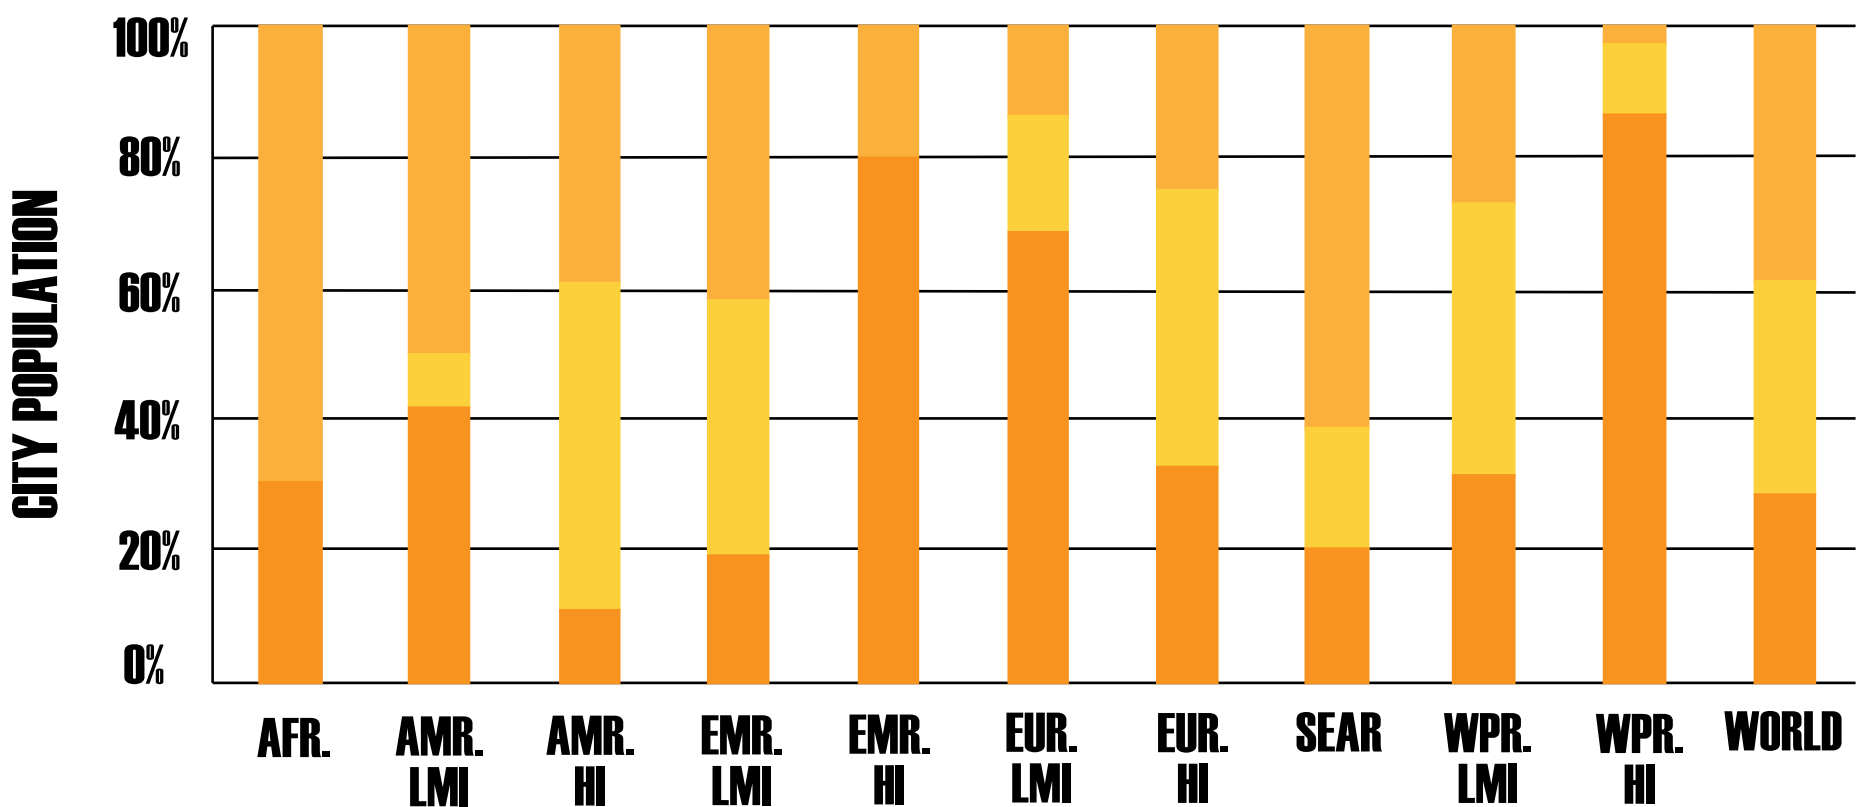

BRITISH COLUMBIA AIR QUALITY says that air quality is “the state of the air around us”

PARTICLE MATTER

Air quality measures **PARTICLE MATTER**. **PM10** are 2.5 - 10 micrometers in diameter. **PM2.5** are 2.5 micrometers or smaller.

the **WORLD HEALTH ORGANIZATION** states that PM 2.5 can be directly “linked to estimates of health risks.” studies of the PM 2.5 can help an area determine possible health risks that the people are exposed to. **HIGH INCOME** counties can afford to have the PM 2.5 studied, while the **LOW** and **MIDDLE INCOME** are not yet able to study their PM 2.5 and the people remain at risk of unknown airborne health risks.
