

PAPER Collection
AMANDA AUGUSTO CASTANHO

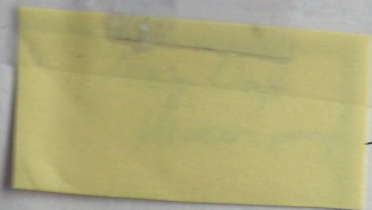

www.kunst-papier.de

For Space/Materiality class we were required to develop a paper collection. We were supposed to collect and catalog all types of paper we would find in our every day surroundings.

The following slides are images of my own collection. The scraps I gathered all over the semester ended up to be a portrait of myself as a consumer, my collection can be consider as an insight of my personal habits.

Above all through the paper experimentation and analysis I was able to grasp the importance and quality of certain materials and how important they are on the construction of the image of a product or service.
