

Podcast Proposal

Maité and Olivea

Private vs Public

What it is that you choose to share with people of different levels of trust/familiarity.

How/what people share when they know that their conversation will be listened to later by strangers.

Double layer of unfamiliarity

Concept

The concept of our podcast is to bring awareness of how open we are as social beings. We are characterized as social animals but we hide so much of ourselves when there's a layer of un-familiarness.

Sample Questions

- ❖ How is your day going?
- ❖ What is the craziest thing that's happened to you?
- ❖ What is your earliest memory?
- ❖ What was your weirdest romantic interaction?
- ❖ Are you fond of your upbringing?
- ❖ What do you think happens after death?
- ❖ Do you think that fact that we are recording you has altered your answers in any way?

Interviewee

We will be choosing a person who knows one of us but not the other. Starting with the stranger interviewing our guest, we will get the initial answers and then after that the friend will interview our guest. This way we will see if there is a contrast in how they answer differently with different people.

Goal

Our goal is to be able to document not only human interaction and how we mediate the fluidity of ourselves when it comes to the level of trust around people but to also analyze what this sounds like.

What comfort, awkwardness and familiarity sounds like.
