

# The Maze Runner

1. Draw a **START** box  in the center with

the same number of branches as the number of people in the group.

2. Each person takes off from 1 branch and starts mapping out their maze until the

surface is filled

3. Each person draws one exit from their maze.

Leave some branches "opened" if you want to connect with other mazes

Personalize your maze by adding details of a specific landscape (city, jungle, underground water line, etc) or by drawing the maze in your own style (round-ish maze, symmetrical maze, funky maze)
