

Tote Bag Repairing

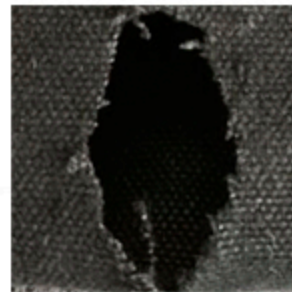

Integrated design

Tori Luo

I want to repair this tote bag because it is my school bag, and I have been using it for about two years. Although it is still pretty strong, it has some little ripped holes on it because I use it very often. My idea is to redesign the bag with the broken part, and to give it a new look.

There are some holes on the upper front, bottom and side of the bag.

Clean up the rough edge of the holes.

Find these tools: a scissor, a little fabric, needle, and thread.

Sew the hole from the inner part of the bag.

**Find a little stuffed toy.
Sew the stuffed toy
on top of the repaired hole.**
