

Space Divider

Leisure Community

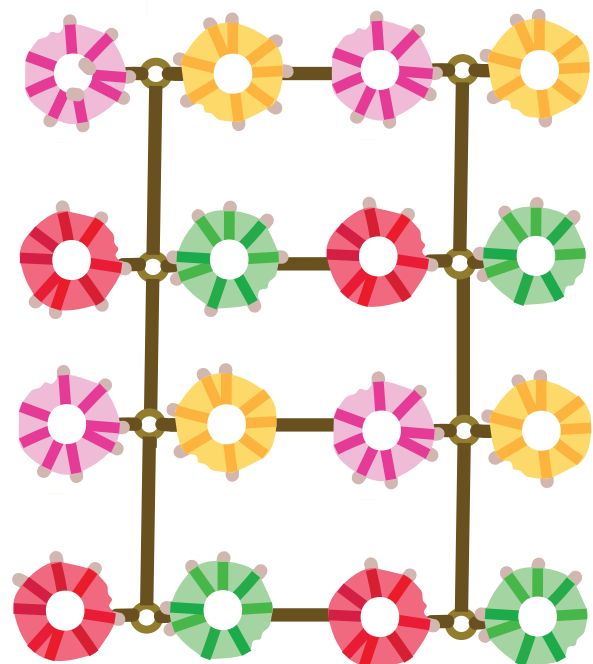

The leisure community addresses those taking any time off from their everyday routine. The aim is to unwind and forget about current worries for a short period of time, and is most often done so by radically changing your environment. A relaxing vacation is typically associated with warmer, more tropical climates. The idea is to create a divider by separating outdoor dining/drinking areas with beach areas. Drink umbrellas, and foam balls promote images of relaxation and stress-reduction.
